

Capabilities Statement

Envirosphere Consulting Development & Infrastructure

There are many legislative and regulatory responsibilities related to development and the provision of infrastructure. Envirosphere's experienced consultants understand Council, State and Commonwealth processes and requirements and can help smooth the pathway to achieve necessary approvals.

Our clients include developers, town planners, project managers, civil contractors, engineers, event companies, construction companies and ecotourism businesses.

Contact us today on (07) 5545 0271 to discuss your project. Our pricing is very competitive and the quality of our services are always highest standard.

Envirosphere Consulting's Development & Infrastructure related services include:

- Environmental application drafting and submission
- Environmental impact assessments
- Ecological analysis (including biocondition monitoring, flora and fauna)
- Ecological restoration design and restoration/rehabilitation management plans
- Offsets – strategy, habitat assessments, delivery plans, management plans and monitoring
- Project management for rehabilitation and ecological restoration projects
- Vegetation management plans, fauna management plans and spotter catcher services
- Arboriculture assessments, arborist reports and tree clearing plans
- Basic ecological site assessments (BESA) and detailed ecological site assessments (DESA)
- Covenant management plans, protected plant survey and reporting
- Stakeholder engagement and consultation
- Drone survey and mapping - GIS data capture and presentation
