

# Capabilities Statement

## Envirosphere Consulting Rural Production

Envirosphere appreciates the diverse needs of rural landholders and approaches to managing the unique opportunities and challenges facing every rural producer. We specialise in working with rural business owners to assess the characteristics of their property and business, and creating long term plans for property management and improvement by guiding implementation of property management plan actions, including offsets and the provision of alternative income streams in a changing environment.

**Our clients include graziers, small crop farmers, poultry producers, irrigators, producer organisations & indigenous land managers.**

**Contact us today on (07) 5545 0271 to discuss your project. Our pricing is very competitive, and the quality of our services are always highest standard.**

### **Envirosphere Consulting's Rural Production related services include:**

- Property /Farm management planning and preparation of Property Management Plans (PMP)
- Offsets, Land Restoration Fund and other alternative land-based income streams
- Soils analysis and investigations
- Vegetation assessments and clearing plans
- Property Map of Assessable Vegetation (PMAV)
- Waterway assessments and mitigation measures
- Ecological analysis (including bio-condition monitoring, flora and fauna)
- Project design, planning and management for land restoration activities
- Assistance moving from traditional farming methods to more ecologically viable practices
- Pest/biosecurity management planning (plants and animals)
- Stock management planning
- Drone imagery, videography and high-resolution mapping
- Map-based plans for natural resource management
